Feeels is a collective of companies implementing 4 development projects on the island of Bali, with a total of 37 units under construction. Our main distinction is in the design and construction of sustainable housing that combines quality, durability, and technology tailored to the tropical climate of the region. This is the essence of the "timeless house" concept.

More than 10 years of experience in low-rise construction.

All houses are designed to last more than 60 years. From a financial point of view, our project is a profitable investment and quick payback period of construction is less than 6 years (which increases ROI)

Bali is one of the most beautiful places on earth and maximizes tourist attraction for the whole world. Every year the flow of tourists increases on the island, providing high load of rental accommodation up to 90%. That is why the property market is currently the most profitable in the world

You sign an agreement with and make a down payment — 30% of your property price. In 2024, you receive the keys to your apartment.

The structure of property transactions in Indonesia has its own specifics and is very different from Russian or European ones. We know first-hand that it is difficult to understand these issues and we will be your loyal guides at all stages of the transaction:

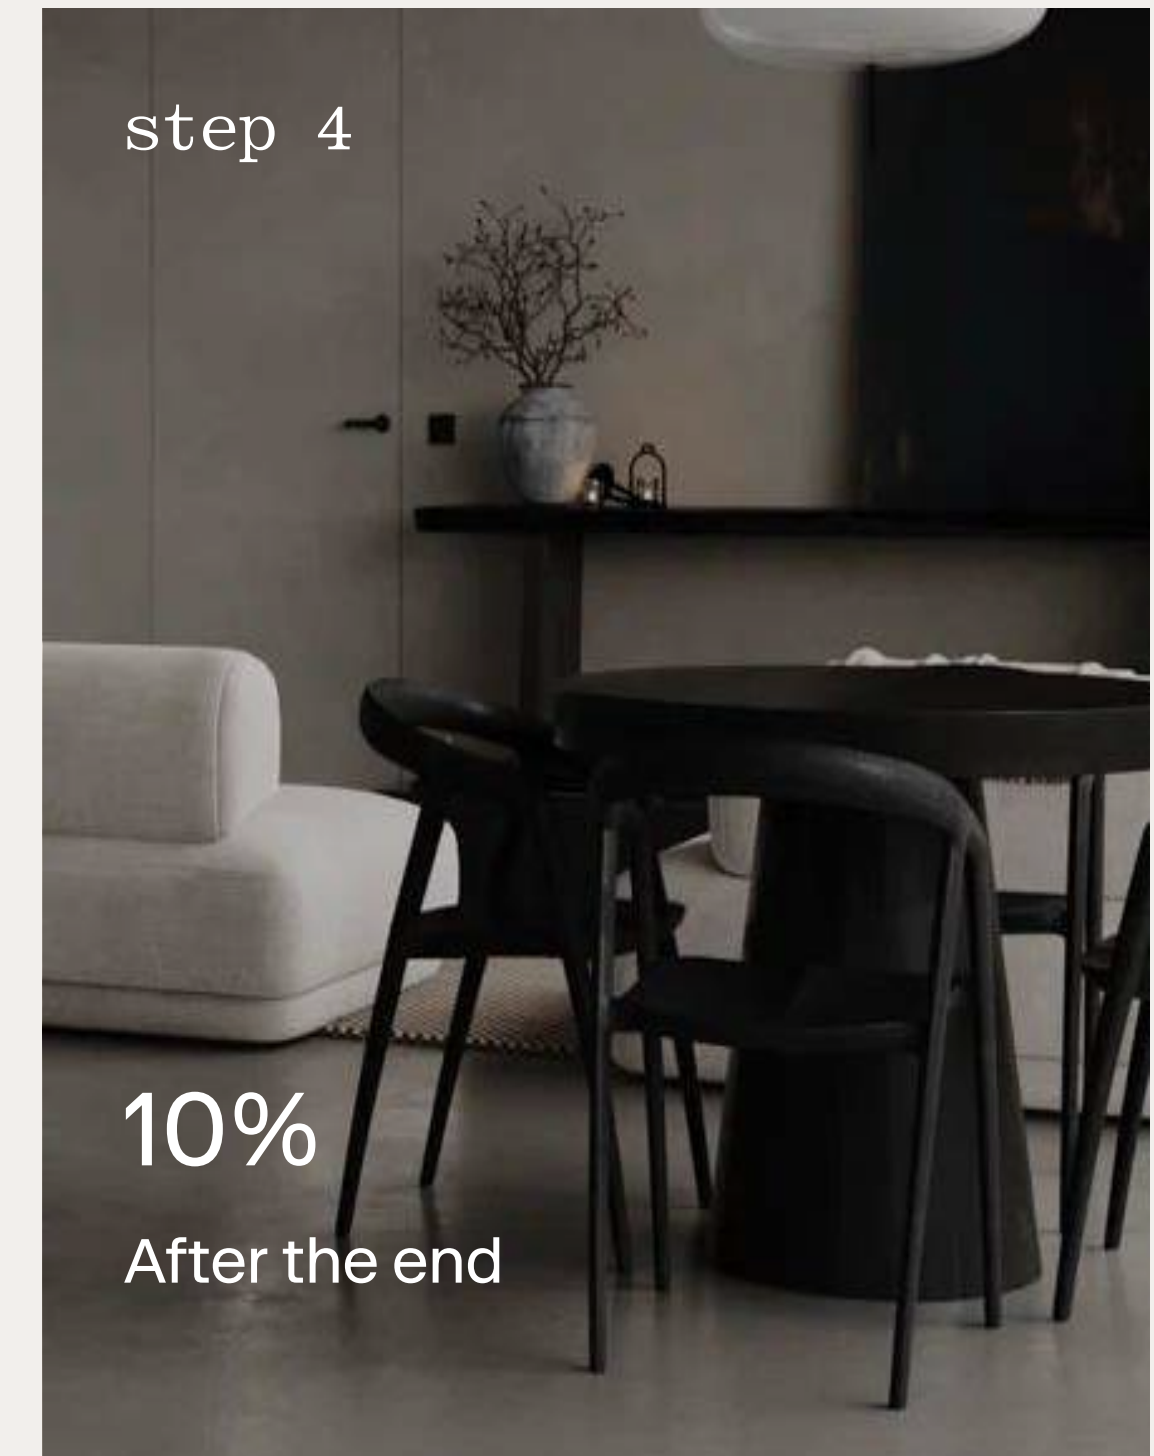

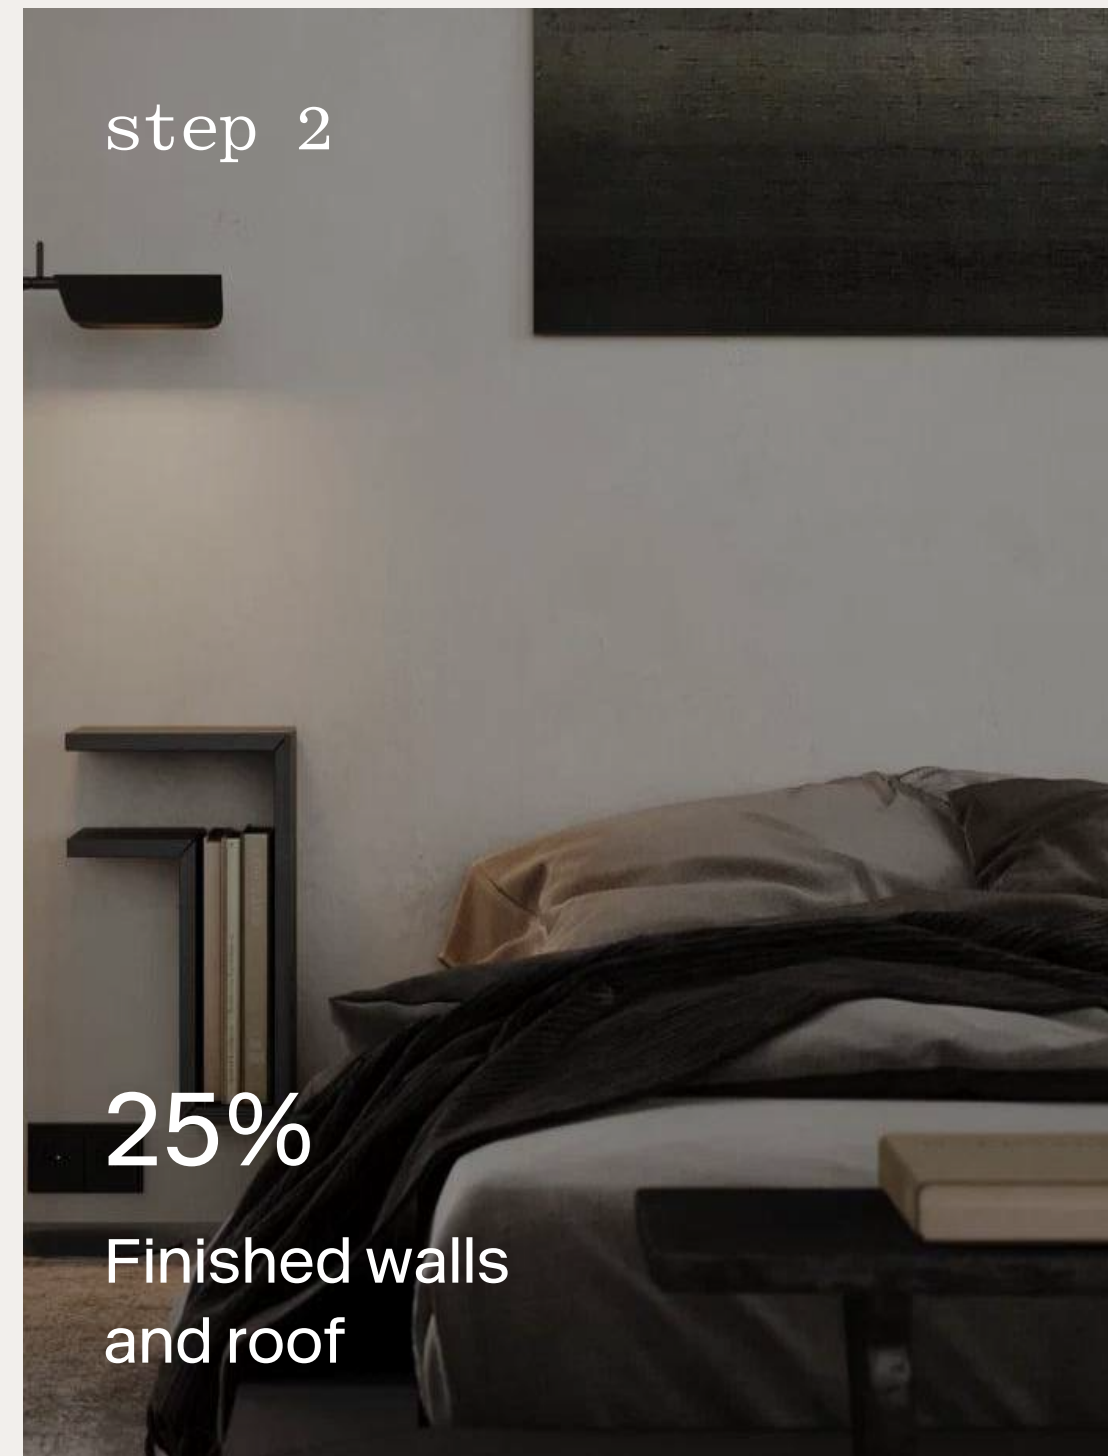

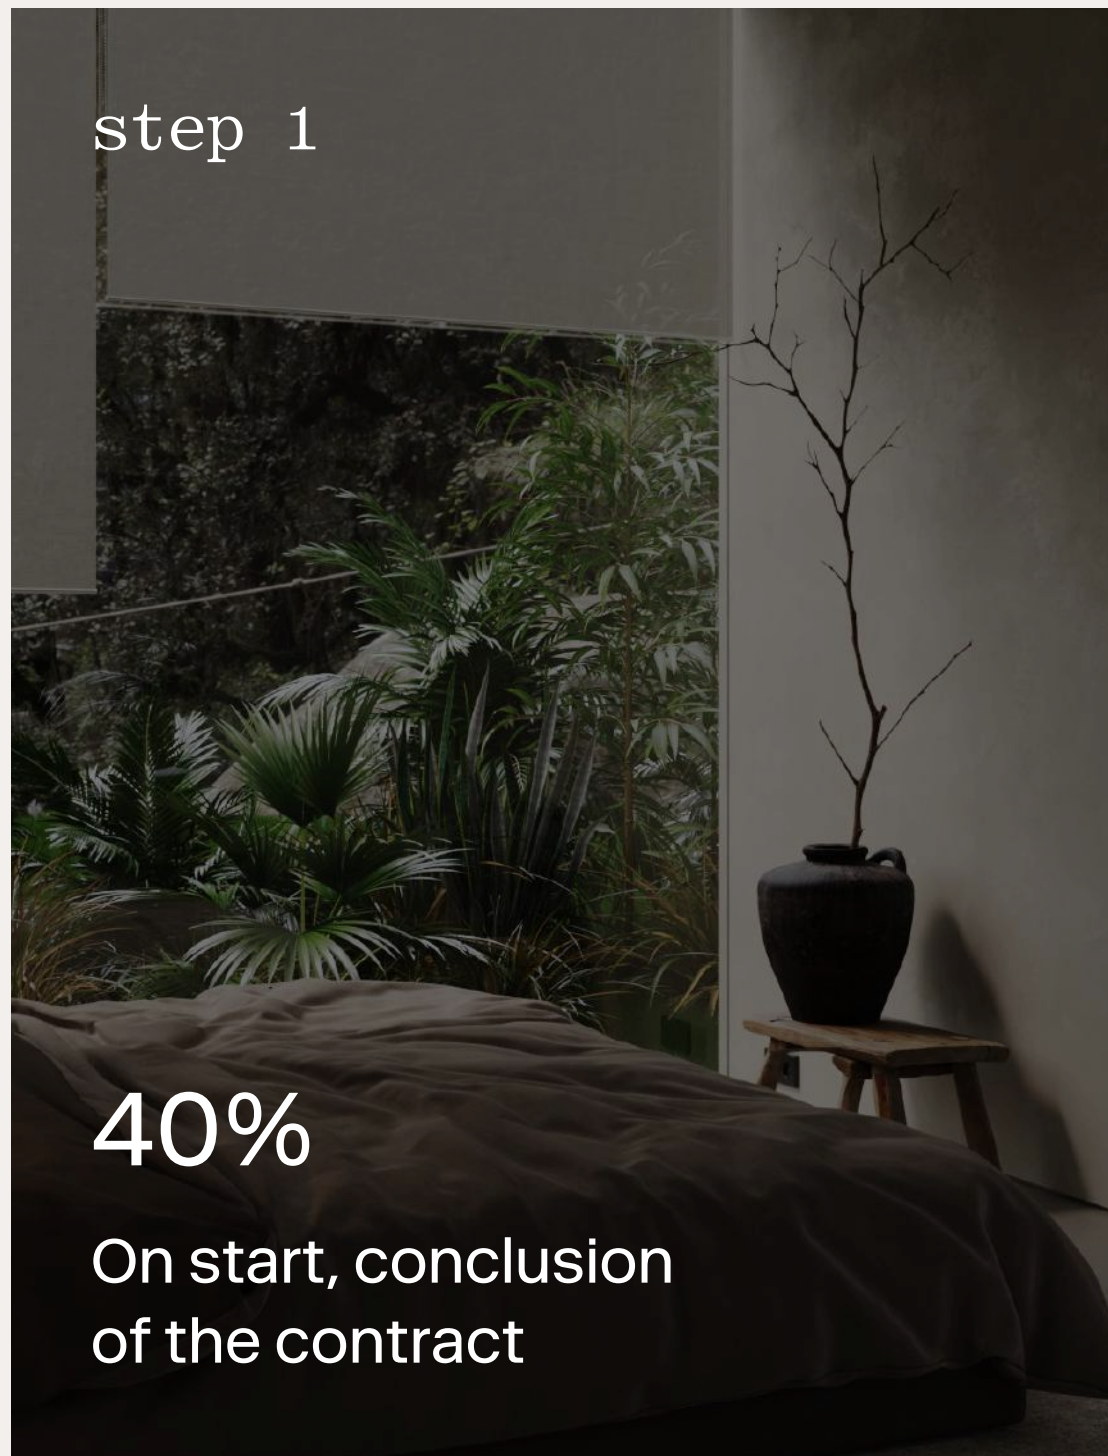

- ① contracts and notarization of transactions
- ② cross-border and multi-currency transactions
- ③ transfer of rights
