Overview

The Creek Beach District is an integral element of the overall Dubai Creek Harbour Masterplan. Located along with the last large plot on the historic Dubai Creek, the Dubai Creek Harbour will be an urban city that will provide a lifestyle experience not found anywhere else in Dubai.

Flanked by the Ras Al Khor Wildlife sanctuary on one side, this waterfront development with spectacular views towards the Dubai Skyline. With the building identified in the masterplan as low to midrise, the design intent is to have a pedestrian-friendly zone at a human scale that encourages shopping, socializing and relaxing.

The vision is to create a modern interpretation of an old Middle Eastern city, with a vibrant ground level of F&B and retail, and residents above.

CREEK BEACH
